

# **GAMMA : Dropped Object PETROLEUM : Survey SERVICES**

In the interests of reducing risk we have seen  
**the dropped object surveys** broaden  
its remit in recent Years to now cover the whole installation  
and our surveys have evolved to cover all of the relevant  
Areas for you, to the extent that we now offer one of the  
most comprehensive services available. We have however,  
retained our approach to these inspections as being as  
practical and pro-active to Ensure that we solve as many  
issues as possible on site, so as to reduce or eliminate the  
amount Faults/failures in the report and to reduce items to  
be attended to going forward.

## **your Individual requirements:**

## **GPS** is a leading provider of **DROPPED OBJECT SURVEYS**

and associated support services to the  
Energy Industry and has been since, and  
before the DROPS initiative was first  
launched.

Our customers Include drilling contractors  
and operators, Worldwide.

Our core business activities involve drilling  
structures this means that every element of what  
we Design, build and install has dropped objects  
considerations from design to installation by our off  
shore Construction personnel.

Therefore consideration for the avoidance of  
dropped objects is intertwined In almost all of our  
business activities.

## **Throughout the process**

our inspectors review and ensure conformity to relevant codes,  
manufacturers Recommendations and legislation.

Our final reports provides a detailed breakdown of a rig's condition, which  
includes highlighting high-risk Areas of concern where immediate  
maintenance is required.
